EDUCATION

Eurasian National University
Computer hardware and software
2022 - 2026

ITStep
Software Development Course
2023 - 2025

SKILLS

- Programming: Python, HTML, CSS
- Backend Development: Django
- Database Management: SQL
- Software Tools: Git, VS Code
- Self-motivated and eager to learn

LANGUAGE

- English
- Russian

ABOUT ME

I am a Python and web development instructor with expertise in Python, HTML, and CSS. I specialize in developing structured training programs, guiding students through hands-on coding exercises, and preparing them for real-world programming challenges.

As a Python developer, I am passionate about writing clean, efficient code, mentoring aspiring developers, and continuously improving my skills in software engineering and modern web technologies.

WORK EXPERIENCE

Python Teacher   2024 – 2025
IT Step

- Taught Python and web development to beginner programmers.
- Developed structured courses and hands-on coding exercises.
- Provided mentorship and technical guidance to students.
- Assisted students in debugging and improving their projects.

Data Engineer   2025 – current
ERG

- Use Superset API for dashboard management, cache warming, and automation tasks.
- Develop and maintain data pipelines using Apache Airflow as an orchestrator.
- Automate data workflows and optimize performance of analytical systems.
- Integrate external APIs and build backend solutions for data processing.
